

GASE is COVID-19 Compliant

We have recently had an onsite visit from the HSE 9th September 2020.

As an employer Gase are committed to ensuring the health, safety and welfare of our employees and all interested parties in the response to the Covid-19 pandemic.

Our adopted strategy:

- Complying with UK Government Advice and Guidance.
- Assessing monitoring and controlling the risk of infection.
- Communicating and consulting with the work force and interested parties to reduce risk.
- Supporting the Welfare and Wellbeing of our employees.

We have put in place arrangements that will allow us to carefully implement our response plans and to monitor the ongoing effectiveness of our risk reduction measures.

We ensure that our employees and interested parties who may be affected are properly informed about the risk and the appropriate steps are taken to reduce them.

For further information regarding our approach to the management of COVID-19 risk prevention, please contact info@gaseaero.com
